## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/28/04 has been entered.

Claims 1-10 are pending.

Claims 11-22 are cancelled.

### ***Response to Arguments***

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-4 and 10 remain rejected under 35 U.S.C. 102(a) as being anticipated by Reiger et al Oncogene vol. 17 p. 2323 (11/5/98). The reasons for this rejection are of record in the paper mailed 2/9/04.

Applicant argues that the screening process is “naturally and logically associated with the experiments” of the 8/3/04 declaration (see supplemental declaration). All applicant shows in the declaration is that one compound is a NOS2 inhibitor. Merely

Art Unit: 1642

showing one compound as an inhibitor does not contemplate a screening process. A screening process is screening a multitude of different compounds for a certain activity and identifying which compound(s) possess said activity. A mere statement that the showing of one compound as an inhibitor and that a screening assay naturally follows does not constitute objective evidence.

Applicant also argues that the difference identity of the NOS2 inhibitor as compared that those in the reference has no bearing on the scope of the claimed invention and states that submitting reduction to practice of one compound is sufficient and that the "screening assay" applies to any and all NOS2 modulators (see supplemental declaration (paragraph 5)). As stated above, applicant has not demonstrated a screening assay.

Applicant further cites MPEP 715.02 and 715.03 and states that the MPEP does not impose a strict requirement for the subject matter in the declaration and the reference be the same. The Examiner never said it did. Again, applicant is directed to MPEP 715.03 which states "where generic claims have been rejected on a reference or activity which discloses a species not antedated by the affidavit or declaration, **the rejection will not ordinarily be withdrawn, unless the applicant is able to establish that he or she was in possession of the generic invention prior to the effective date of the reference or activity.**" (emphasis added). Applicant has not demonstrated that he had possession of the generic invention prior to the effective date.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 8 remains rejected under 35 U.S.C. 103(a) as being unpatentable over Reiger et al Oncogene vol. 17 p. 2323 (11/5/98) in view of applicant admission on page

Art Unit: 1642

17, lines 26-31 of the specification). The reasons for this rejection are of record in the paper mailed 2/9/04.

Applicant's arguments have been addressed above.

### ***Allowable Subject Matter***

Claims 5-6 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

This is a RCE of applicant's earlier Application No. 09/830977. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1642

the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
